

# Captive Coal Mining 2013

## Sector Outlook and Project Opportunities

*With domestic coal production not growing in tandem with the demand, and the volatility in global coal prices, captive coal mining presents an attractive opportunity. The **Captive Coal Mining Report** will provide an update on the current state of captive coal mining in India. The report will present the evolution of the policy framework and its impact on the sector. It will also provide profiles of projects under production, those under development, and deallocated blocks.*

*The report will discuss the captive coal mine allocation and production trends, project economics, and the risks and challenges involved in captive mining. The report will also present the outlook for the sector.*
