Laying the groundwork for satellite-based broadband services

Key stakeholders in the satellite broadband space, including OneWeb, Telesat and Nelco, are making efforts to launch commercial satellite broadband services in India. Their efforts have been supported by the government, which is currently reviewing policies and seeking to establish an appropriate framework for the adoption of these services. A conducive regime that enables the rapid launch of satellite-based internet services will help the country achieve its vision of Digital India.

Telefocus: Evolving 5G Ecosystem 42

The 5G ecosystem is witnessing a significant evolution, with a number of countries gearing up to commercialise services. Governments, telcos, device and handset manufacturers, infrastructure providers, software and technology vendors are all playing a crucial role in this evolution. A look at the recent developments in the 5G space and the plethora of opportunities opening up for stakeholders across the telecom value chain.

Enterprise Telecom: Travel and Hospitality 52

The travel and hospitality industry is turning to new-age solutions to deliver a highly personalised experience to customers. They are increasingly deploying technologies such as IoT, AI and big data, which offer a number of benefits. While there are various deployment challenges, technology uptake among travel and hospitality enterprises is expected to only increase going forward.
